Subject: Microsoft Settlement

Section III,2,b clearly allows Microsoft to retaliate against an OEM that is or is contemplating shipping a PC without a Microsoft operating system. This is unacceptable. Microsoft should not be allowed to retaliate against an OEM that ships a PC which does not include a Microsoft operating system.

"shipping a Personal Computer that (a) includes both a Windows Operating System Product and a non-Microsoft Operating System, or (b) will boot with more than one Operating System;" (US vs MS PFJ)

I propose an amendment: (c) does not include a Microsoft Operating System

Thank You for your consideration,
Andrew Leonczyk
